

ENVIRONMENTAL POLICY

In the course of its business operations KALL Ingredients Ltd. manufactures a variety of products from maize: starches, carbohydrates, protein-based feed products and alcohol products, for the food industry and other industries.

KALL Ingredients Kft places special emphasis on the prevention of adverse environmental effects and pollution, and protects the natural environment from damages resulting from the organization's activities, products and services.

Our environmentally conscious commitment is evidenced by the introduced and certified ISO 14001 standard.

In its business practice, KALL Ingredients Kft. consciously enforces environmental aspects, is committed to the application of BAT technologies and the production of environmentally friendly products in the interests of sustainable development.

Efforts to increase environmental performance and the planning of related activities are implemented on the basis of environmental targets, which are reviewed annually at upper management level. The company's environmental goals apply to all areas, activities and methods within the company.

KALL Ingredients Kft. carries out its activities while ensuring the sustainable use of natural resources and compliance with the law. During its operation, it constantly strives to prevent environmental pollution and to reduce the amount of waste.

In the course of its activities, KALL Ingredients Kft. maintains a close, cooperative relationship with concerned parties.

During its decisions, KALL Ingredients Kft. reviews the environmental impacts of new investments and developments prior to implementation, and strives to comply with its environmental objectives and reduce emissions during operation.

The consideration of the environmental policy, the achievement of the related goals, and the operation and continuous development of the environmental management system are the personal responsibility of all employees of KALL Ingredients Kft.
