

QUALITY FOOD AND FEED SAFETY POLICY

KALL Ingredients Ltd. manufactures and sells products manufactured from top quality maize for food, pharmaceutical, feed and other industry uses. We work to satisfy the requirements of our customers by strict specification of the parameters of our finished products and our manufacturing processes, as well as by quality-oriented supervision making sure that such requirements are met.

KALL Ingredients Kft. is committed to the establishment and operation of quality management and food safety system and the development of food safety culture. Our company is dedicated to meeting the current needs of our customers and the growing market demands by creating and maintaining high quality products and services. Management is also committed to conducting business in a manner that is highly compliant with ethical and European standards, and not only to operating in compliance with laws and other requirements, but also to operating a mutually beneficial business model based on mutual respect and goals for our partners, customers and suppliers.

Our company manufactures its products exclusively from high-quality, non-genetically modified maize, which we source from reliable and regular suppliers. Continuous testing of raw materials, intermediate and finished products arriving in our laboratory, registered with NÉBIH, equipped with modern technology and well-trained professionals, and accurate traceability and documentation of each production batch are ensured.

Our company ensures the proper quality of the products and the maintenance of customer satisfaction by applying strict food safety regulations. In line with our commitment, we operate a HACCP manual and certify our quality and food safety management system to ISO 9001, ISO 22000, BRC, IFS, HALAL, KOSHER and EFISC standards. We consider it important to minimize the negative impact on the environment besides our activities, thus the ISO 14001 Environmental Management System has been introduced. Furthermore our company operates ISO 50001 Energy Management System in order to reduce energy consumption. In order to protect the health and safety of our employees and prevent accidents, our company operates in accordance with the ISO 45001 occupational health and safety management system. We operate these systems as an independently certified and regularly audited, integrated system for detecting non-conformities as soon as possible which helps our organization achieve our goals.

Our employees know the quality and food safety policy of our company, our activities are in line with all its main thrusts.
